**Parenting - Wikipedia**

Parenting or child rearing promotes and supports the physical, emotional, social, and intellectual development of a child from infancy to adulthood. Parenting refers to the intricacies of raising a child and not exclusively for a biological relationship. The most common caretaker in parenting is the father or mother, or both, the biological parents of the child in question.

**How Cultural Differences Shape Your Gratitude**

Jan 01, 2012 · Parenting styles that are congruent with cultural norms appear to be effective in transmitting values from parents to children, perhaps because parenting practices that approach the cultural norm result in a childrearing environment that is more positive, consistent, and predictable and in one that facilitates children’s accurate perceptions.
Jul 15, 2019 · Jonathan Tudge, a professor at the University of North Carolina at Greensboro, is perhaps the foremost expert on cultural differences in gratitude. When he first started exploring the topic ten years ago, he found virtually no existing research. Last year, Tudge and his colleagues published a series of studies examining how gratitude develops in children across seven very different countries.

**Experience of stress in parents of children with ADHD: A**

Nov 12, 2019 · Introduction. Attention deficit/hyperactivity disorder (ADHD) is a common mental health disorder of children and adolescents, impacting an estimated 63 million children and adolescents worldwide (Polanczyk, Salum, Sugaya, Caye, & Rohde, 2015). With core symptoms of inattention and/or hyperactivity-impulsivity, ADHD is a chronic condition that interferes with an individual’s functioning.
