The use of biopesticides and biofertilizers in agriculture enhance crop. Biopesticide and biofertilizer applications, have produced remarkable results. Plant pathology, biofertilizers & biopesticides. The degree of infectivity of a given 'biologicals' (biofertilizers and biopesticides) are microbial products that increase agricultural productivity, while also contributing to soil health. Biofertilizers and biopesticides contain living microorganisms or their products which, when applied to seeds, plant surfaces, or soil, promote growth and . Biofertilizers are considered as an important alternative source of plant nutrition. Biopesticides and biofertilizers have emerged as a potential environment. Apex biofertilizers and biopesticides limited | 141 followers on linkedin. Our mission is to move towards sustainable agriculture in nature. Soils to promote plant growth. Calcium (ca), magnesium (mg), and . Developing biopesticides, biofertilizers and biopesticides for next generation green revolution and sustainable agriculture. Biofertilizers and biopesticides is a comprehensive book useful for students, researchers, scientists, farmers including policy makers following concepts of .

**Advancing Knowledge About Biopesticides & Biofertilizers - BPIA**

The Biological Products Industry Alliance (BPIA) promotes the responsible development of safe and effective biological products including biopesticides, biostimulants, and biofertilizers as beneficial tools for commercial agriculture, forestry, golf courses, home gardens, horticulture, ornamentals, public health, and more through education, outreach, and advocacy activities at the state

**Mustard plant - Wikipedia**

The mustard plant is any one of several plant species in the genera Brassica and Sinapis in the family Brassicaceae (the mustard family). Mustard seed is used as a spice. Grinding and mixing the seeds with water, vinegar, or other liquids creates the yellow condiment known as prepared mustard. The seeds can also be pressed to make mustard oil, and the edible leaves can be eaten as mustard greens.

**Insights on the Agricultural Biotechnology Global Market**

Oct 15, 2021 - Global agricultural biotechnology market will reach $115.0 billion by 2030, growing by 9.8% annually over 2020-2030 owing to the rising population, the burgeoning demand for food, and the rising adoption of enhanced technologies for crop cultivation. This report is based on a comprehensive research of the entire global agricultural biotechnology market and all its sub-segments through
