Selected Writings on Marxism Stuart Hall 2021-04-02 Throughout his career Stuart Hall engaged with Marxism in varying ways, actively rethinking it to address the political and cultural exigencies of the moment. This collection of Hall's key writings on Marxism surveys the questions central to his interpretations of and investments in Marxist theory and practice. It includes Hall's readings of canonical texts by Marx and Engels, Gramsci, and Althusser; his exchanges with other prominent thinkers about Marxism; his use of Marxist frameworks to theorize specific cultural phenomena and discourses; and some of his later work in which he distanced himself from his earlier attachments to Marxism. In addition, editor Gregor McLennan's introduction and commentary offer in-depth context and fresh interpretations of Hall's thought. Selected Writings on Marxism demonstrates that grasping Hall's complex relationship to Marxism is central to understanding the corpus of his work.

Rules of Sociological Method Emile
Durkheim 1982-12-01 First published in 1895: Emile Durkheim's masterful work on the nature and scope of sociology—now with a new introduction and improved translation by leading scholar Steven Lukes. The Rules of the Sociological Method is among the most important contributions to the field of sociology, still debated among scholars today. Through letters, arguments, and commentaries on significant debates, Durkheim confronted critics, clarified his own position, and defended the objective scientific method he applied to his study of humans. This updated edition offers an introduction and extra notes as well as a new translation to improve the clarity and accessibility of this essential work. In the introduction, Steven Lukes, author of the definitive biography Emile Durkheim: His Life and Work, spells out Durkheim’s intentions, shows the limits of Durkheim’s view of sociology, and presents its political background and significance. Making use of the various texts in this volume and Durkheim’s later work, Lukes discusses how Durkheim’s methodology was modified or disregarded in practice—and how it is still relevant today. With substantial notes on context, this user-friendly edition will greatly ease the task of students and scholars working with Durkheim’s method—a view that has been a focal point of sociology since its original publication. The Rules of the Sociological Method will engage a new generation of readers with Durkheim’s rich contribution to the field.

Marx and Marxism
Peter Worsley
2013-08-21 Karl Marx probably had more influence on the political course of the last century than any other social thinker. There are many different kinds of Marxism, and the Twentieth Century saw two huge Marxist states in total opposition to one another. In the West, Marxism has never presented a revolutionary threat to the established order, though it has taken root as the major theoretical critique of capitalist society in intellectual circles, and new interpretations of Marx’s thought appear each year. Peter Worsley discusses all these major varieties of Marxism, distinguishing between those ideas which remain valid, those which are contestable, and those which should now be discarded. Rather than treating Marxism purely as a philosophy in the abstract, he concentrates upon the uses to which Marxism has been put and emphasises the connections between the theoretical debates and political struggles in the real world.

On Charisma and Institution Building
Max Weber 1968-12-15 This selection from Max Weber's writings presents his variegated work from one central focus, the relationship between charisma on the one hand, and the process of institution building in the major fields of the social order such as politics, law, economy, and culture and religion on the other. That the concept of charisma is crucially important for understanding the processes of institution building is implicit in Weber's own writings, and the explication of this relationship is perhaps the most important challenge which Weber's work poses for modern sociology. Max Weber on Charisma and Institution Building is a volume in "The Heritage of Sociology," a series edited by Morris Janowitz. Other volumes deal with the writings of George Herbert Mead, William F. Ogburn, Louis Wirth, W. I. Thomas, Robert E. Park, and the Scottish Moralists—Adam Smith, David Hume, Adam Ferguson, and others.
